

ABSTRACT

A vehicle seat (11), in particular functioning as a rear vehicle seat (11) having a seat element (14) provided at the free end of the backrest (13), and a vehicle (10) with such a seat (11) are specified in which the seat element (14) is pivotably linked to a backrest structure (16) of the vehicle seat (11) and the seat element (14) acts at the same time as a headrest and as protection against rollover.
